The set of problems was difficult enough according to the contest's level.

The system's architecture also included two servers, one in each site, with similar configurations and better performance than the client computers.

The evaluation of the results and the scoring were based on e-judge.

The 88 teams numbered over 350 students, coaches, reserves and guests. There were more than 20 staff members and more than 50 volunteers who contributed to the organization and run of the contest.

The first three teams in Bucharest site received prizes. The first teams in Vinnitsa received prizes from partners of Ukrainian site.
